DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9 and 18-22, ^{are} drawn to a utility that controls access to distinct tiers of system protection, classified in class 713, subclass 166.
- II. Claims 10-14, ^{are} drawn to mutual entity authentication, classified in class 713, subclass 139.
- III. Claims 15-17 and 23-25, ^{are} drawn to initialization program, classified in class 713, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable.

In the instant case, subcombination I has separate utility such as negotiating security parameters and exchanging information within a plurality of modes. See MPEP § 806.05(d).

In the instant case, subcombination II has separate utility such as dynamically discover a security policy of a second computer wherein the first computer and the second computer are communicatively coupled to a computer network to exchange security policies.

In the instant case subcombination III has separate utility such as a method for executing a security policy at a first network device wherein the first network device is communicatively

coupled to a second network device over a computer network wherein the first network device provides initial security parameters.

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
